

ageLOC LumiSpa Accent with ageLOC LumiSpa IdealEyes

Theory

The use of a strategically formulated topical to target the undereye area used with a device created to gently massage the delicate skin around the eyes can yield phenomenal visible benefits.

Practice

Nu Skin commissioned a third-party research organization to evaluate the short- and long-term benefits of the ageLOC LumiSpa Accent System. Thirty Caucasian, female subjects age 35-65 were recruited to complete the clinical evaluation. Efficacy of the system was evaluated by the subjects.

Short-term Outcomes

Subjects noted visible improvements as early as one week:

- ✓ the appearance of dark circles
- ✓ the appearance of bags
- ✓ the appearance of puffiness

Subjects noted immediate improvement in their skin's:

- ✓ luminosity
- ✓ radiance
- ✓ evenness of skin tone

Long-term Outcomes

By week 12, subjects noted the following changes in their skin's appearance:

- 24% ↓ the appearance of dark circles
- 23% ↓ the appearance of bags
- 28% ↓ the appearance of puffiness

- 23% ↑ in luminosity
- 30% ↑ in radiance
- 21% ↑ in evenness of skin tone

Conclusion

ageLOC LumiSpa Accent System can quickly and effectively improve the appearance of the skin around the eyes, and these results continue to improve with longer use.
